Key Facts About the Census

The basics:

- The census counts every person living in the United States, regardless of age or citizenship status, every 10 years in years ending in 0.
- It’s in the Constitution
- There is NOT a Citizenship question on the 2020 Census.

It’s important:

- It’s about money, power, and data.
- Every year people pay their taxes. Only every 10 years, we help decide how those dollars come back to us. The 2020 Census will help to distribute billions of dollars in federal resources to your community.
- Our community gets resources based on population counts, that helps pay for schools, roads, police, fire, health care and many more services. An undercount in our community would jeopardize our full share of these resources.
- An accurate and complete Census helps businesses, community leaders and elected officials make informed decisions every day.

It’s easy:

- For the first time, people can respond online and by phone, in addition to the mail-in option. It takes about 10 minutes to complete and impacts the next 10 years because the next Decennial Census does not happen until 2030.

It’s safe and confidential:

- Your data is protected and it’s confidential. Federal law protects your responses, which cannot be shared with law enforcement, immigration agencies, or housing authorities.

COVID-19 & the 2020 Census:

- The 2020 Census is underway and the most important and safe thing you can do is respond online, by phone, or by mail. It has never been easier to respond to the 2020 Census.
- Responding now will minimize the need for the Census Bureau to send census takers out into communities to follow up with households.
- Please check this page regularly for updates on operational adjustments in response to COVID-19. See the latest status of operations & current timeline.
Social Media

Share information on your social media channels about the census and why it's important to respond. Everyone can play a role in ensuring that everyone is counted once, only once, and in the right place.

30 seconds

The COVID-19 pandemic underscores the importance of responding to the 2020 Census and the importance of census data. That’s because your response helps shape decisions about how billions of dollars in federal funds flow into communities each year for the next 10 years for critical services. Like health care clinics. And hospitals. And emergency services like EMTs and fire departments. Emergency situations like COVID-19 illustrate just how important it is to respond to the census. So please do today at 2020Census.gov.

30 seconds

Getting an accurate count of everyone who lives in the United States is so important. Especially right now! The census helps inform how billions of dollars in federal funds are spent every year for services that are critical to all of us, including hospitals, health clinics and emergency response like EMTs and fire departments. Today we all see how important these services are. So, please respond at 2020Census.gov as soon as you can.

30 seconds

There will be parties again soon, and family gatherings. There will be parades and sporting events and concerts. To help our communities when they come back together after the COVID-19 pandemic, I’m asking you to please respond to the 2020 Census now. Spend a few minutes online today to impact the next 10 years of funding on healthcare, infrastructure, and education. We all see how important these are today. So please go to 2020Census.gov and respond today to make America’s tomorrow brighter.

Audience Segmentation

2020 Census audience segments are groups of census tracts with similar predicted self-response behavior and similar demographic variables associated with self-response. These audience segments were determined by the U.S. Census Bureau for their distinctive patterns of media consumption and distribution of census mindsets. The eight 2020 Census audience segments in the U.S. range from highly likely to respond to the census to unlikely to respond.

- 2020 Census Audience Segments
